## DETAILED ACTION

### ***Double Patenting***

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-2,5,8, and 22-28 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1 and 25 of copending Application No. 10/028,837. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims of 10/028,837 incorporate the limitations of the claimed apparatus recited in instant claims 1-2,5,8, and 22-28. Claim 1 and 25 of 10/028,837 recite an apparatus for the exposure of a selected portion of an optical fiber to a gaseous atmosphere by loading an optical fiber onto loading chamber that comprises hydrogen, affixing seals onto the optical fiber and heating the atmosphere surrounding the selected optical fiber portion. While claims 1 and 25 are silent specifically disclosing a heating element as recited in the instant claims 1-2,5,8, and 22-28, it is obvious to one of ordinary skill in the art at the time the

invention was made that a heating element would be required to achieve the claimed heating step recited in claims 1 and 25 of 10/028837.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

***Response to Amendment***

The previous objections to the drawings are withdrawn. Additionally, applicant's filed amendment obviates the 35 USC 112 2<sup>nd</sup> paragraph rejection made to claims 7,9,10,12,16,23, and 30.

***Allowable Subject Matter***

Claims 3-4,6-7, 9-21 and 29-32 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
